

Winterize Your Boat with WD-40!

When it comes to winter one of the most essential tools for protecting your boat and equipment from the elements is to have WD-40 Multi-Use Product at hand. A liberal spray of WD-40 can clean, protect or prevent rust on pulleys, engine parts, winch cables, choke levers, steering/console controls, on-board machines and hand tools (to name but a few) during those harsh winter months. With the help of Smart Straw™ you never have to worry about losing the straw onboard again because the new design means it is fixed to the can. You still get the same wide and narrow spray options that allow you to cover larger areas when needed and a more precise application for those difficult to reach places to make sure all of your boating equipment is protected for the winter.

Whatever your boating needs: WD-40 Multi-Use Product takes care of it!

WD40

Dispels moisture and lubricates/protects so ideal for preparing your boat for the winter storage.

Rig

Helps loosen/free all those pins, shackles and bolts and a good spray keeps them lubricated all winter and ready to go next spring

Spray all shivs/turning blocks - anything that moves!

Electrics

Spray all electric fittings. WD dispels the moisture which will cause winter corrosion.

Deck

Spray all moving parts. Ideal to coat any items you are wrapping/covering.

Engine/Cables/Levers

Coat them all

Below

Loads moving parts. Hinges – Cookers - Door locks - Shower fittings
Everywhere you see metal as it will happily spend the winter corroding if you don't lubricate it!!!

Tool and spares box...just spray the lot!

Sticky tape residue..take all those bits of tape off...WD does a great job with the final clean up.

WD-40 Multi-Use Product takes care of it!

To quote Clint Eastwood in Gran Torino - "You can fix almost anything if you have a can of WD 40 and some duct tape"
